

# Qubika Sports Club Management System - Defect Report

Defect Ticket ID: QBK-17512

## [UX/UI]: Table Columns Alignment shifts on Page change

**Reporter:** Joshua Acciarri

**Date:** 03/09/2025

**Environment:** QA Env (URL: <https://club-administration.qa.qubika.com/#/auth/login>)

**Found on:** Chrome 136 (Windows 11)

**Credentials:** Email: *test.qubika@qubika.com* | Password: *12345678*

### Description:

On every pagination navigation, the **table columns shift horizontally** (to the left or right), creating an inconsistent layout. This sudden shifting disrupts the user's ability to follow rows and columns, resulting in a **confusing and uncomfortable user experience**. It's particularly problematic when users are scanning data across columns because the eye loses alignment due to the shift.

**Severity:** S2 (Major)

**Priority:** P3 (Medium) – Should be fixed soon, but it's not blocking core functionality.

**Expected Result:** Table columns should remain consistently aligned across all pages during pagination.

**Actual Result:** Table columns shift horizontally on page change, disrupting user readability.

### Steps to Reproduce:

1. Navigate to <https://club-administration.qa.qubika.com>
2. Log in with valid credentials (test.qubika@qubika.com / 12345678).
3. Navigate to any table by clicking an item from left nav panel ('Contribuciones', 'Tipos de Categoria', 'Miembros', ...)

4. Identify the pagination component at the bottom of the page.
5. Click on the **next page** button (right chevron arrow >).
6. Observe that the column alignment shifts horizontally compared to the previous page.
7. Repeat for multiple pages to confirm.
8. Repeat for all tables on all items present on left navigation panel.
